

# The Medical University of Innsbruck invites applicants for the position of a **FULL PROFESSOR FOR RNA BIOLOGY AND GENOMICS** at the Department of Biochemistry, Molecular Biology and Pathophysiology

MEDIZINISCHE  
UNIVERSITÄT  
INNSBRUCK

In the heart of the Alps, in Austria, the Medical University of Innsbruck provides ideal conditions for academic achievements. Top level teaching, training and research, as well as high-end medical treatment are the University's core missions.

We advertise the position of a Full Professor of RNA Biology and Genomics, starting in October 2024.

The position will reinforce the University's scientific focus on genetics, epigenetics and genomics, ensure its continuous visibility on a global scale and is foreseen to strengthen translational research within the Medical University of Innsbruck.

It will be embedded in the Institute of Genomics and RNomics within the Department of Biochemistry, Molecular Biology and Pathophysiology (Biocenter Innsbruck), which offers a broad research and infrastructure spectrum. The holder of the position is expected to represent the field of RNA Biology and Genomics in teaching and research. We are looking for an internationally renowned candidate with a strong expertise in the field of RNA Biology.

We offer a fulltime appointment, initially limited to a period of 5 years; employment on a permanent basis will be possible after positive evaluation.

## Employment requirements:

- MD or PhD with a doctorate relevant to the subject or a comparable tertiary level education corresponding to the profile of the position
- strong publication record
- expertise in state of the art techniques for innovative research on RNA functions and RNA processing in healthy as well as disease-relevant model systems
- representation of the area in all academic programs of the University
- teaching experience and commitment to engage in the academic development of the curricula
- proof of successful and constant acquisition of competitive third-party funding
- leadership experience in interdisciplinary research cooperations
- leadership and management experience

## Expected:

- excellent inter- and multidisciplinary research to strengthen the University's scientific focus on Genetics – Epigenetics – Genomics
- management and motivational skills in the field of human resources
- commitment to develop personal management skills

The Medical University of Innsbruck aims to increase the proportion of women in executive positions and therefore explicitly encourages qualified female candidates to apply. In case of equivalent qualifications, preference will be given to female applicants.

Candidates with disabilities and / or chronic diseases are encouraged to apply as well.

Please submit your application in digital form to the Medical University of Innsbruck, using the e-mail address: [berufungen@i-med.ac.at](mailto:berufungen@i-med.ac.at) by **February 6th, 2024** at the latest (deadline, 24:00 CET).

Applications must be complete according to the formal requirements (see: [www.i-med.ac.at/berufungen](http://www.i-med.ac.at/berufungen)).

Applicants are informed that the Medical University of Innsbruck will not compensate for any costs that emerge in course of the recruitment process of this position.

In case of inconsistencies between the German and the English versions of this tender, the legally binding version is the German one.
